

Mbira Physics and the Songs of Iron

Monday 26th October, 8pm

A Science Café with Nhamburo Ziyenge and Fidelis Mherembi

This unique collision of African traditional music and cutting-edge physics sheds light in all directions! Physicist Nhamburo Ziyenge is joined by mbira master Fidelis Mherembi for an evening of learning and pleasure – an evening that unites the worlds of music and science, of tradition and research.

FREE!

Since the days of Ancient Greece music and science have been seen as twins. Nhamburo Ziyenge revives this ancient tradition with an evening that first introduces the subtleties of the Zimbabwean thumb piano, the mbira – and then uses them to explore some of the fundamental laws of physics. With dazzling performance by mbira master Fidelis Mherembi!

Sponsorship by The Festival of Learning means that this unique Science Café is FREE! Booking essential on 0117 924 4512 or info@pieriancentre.com. 7.30 for 8pm start. The Pierian Centre is at 27 Portland Square, Bristol BS2 8SA.
